

Abstract

**A METHOD FOR ACTIVE USER FEEDBACK**

5

A method (1200) of providing active user feedback in a graphic user interface is disclosed. The method comprises selecting (1206) a soft control currently displayed on the graphic user interface, said soft control enabling a change to be implemented, and displaying (1208) on said graphic user interface, only during said soft control selection, and dependent upon the selecting step (1206), a pop-up preview reflecting said change.
